SUMMARY

Full-stack web developer with 2.5+ years of professional experience and multiple independently shipped SaaS products. Strong in Next.js/React, TypeScript, Tailwind CSS, Node/NestJS, Python/Django, SQL/MongoDB, Stripe and Vercel. Comfortable owning a website or product end to end: responsive UI, APIs, auth/payments, testing, deployment, technical SEO/PSEO and production debugging. I use Claude Code and OpenAI Codex in a daily AI-native workflow while reviewing, testing and taking responsibility for the code that ships.

WORK EXPERIENCE

Software Engineer, ComboKid (Hong Kong)

March 2024 – September 2026

- **Milestone Track (Next.js, Django/Python, OCR, GPT):** Built the feature end to end across the UI, Python API and data layer. OCR + LLM extraction turned source documents into structured child-milestone records, reducing manual entry and improving data accuracy.
- **ComboKid Mobile App (Flutter, Firebase, Node.js):** Shipped engagement features for Android/iOS, diagnosed unreliable API access for users in China, and built a Node.js proxy that restored stable REST performance.

SELECTED PROJECTS

Tools To Find — AI SaaS & SEO/PSEO (Next.js 15, React 19, TypeScript, MongoDB) [toolstofind.com](#)

Built and operate a production SaaS with programmatic SEO architecture, metadata/canonical/sitemap/indexation controls, Gemini + provider fallback, Google OAuth, Stripe subscriptions/webhooks, analytics, CMS tooling, scheduled jobs and automated tests; deployed on Vercel.

ThinkINeed — Full-stack AI SaaS (Next.js 15, React 19, TypeScript, NestJS, MongoDB, Redis) [Live](#)

Built split frontend/backend services with OpenAI, Anthropic and Gemini integrations, real-time chat, Stripe billing, JWT/OAuth, queues/caching and Jest, Vitest and e2e test workflows.

HalalGen — AI image product (Next.js 15, Gemini, MongoDB, Stripe) [halalgen.app](#)

Built and operate the product end to end, covering responsive UI, authentication, AI generation, file uploads, billing, token/usage controls and product delivery.

SmartForm AI — Browser automation (Chrome Manifest V3, JavaScript)

Built context-aware job-application form automation using content scripts, Chrome scripting APIs, a background service worker, side panel and browser storage.
